## PROFESSIONAL SUMMARY

Forward Deployed Engineer with 3+ years of experience in enterprise software, APIs, full-stack development, cloud infrastructure, and enterprise integrations. Experienced in client engagement, scalable application development, and AI-driven automation. Strong background in React.js, Golang, Python, system design, and cloud-integrated enterprise solutions.

## SKILLS

- **AI & LLM Systems:** OpenAI, Prompt Engineering, Anthropic Claude, RAG, Vector Search, NLP (Hugging Face, NLTK)
- **Backend & APIs:** Golang, Python (Django, Flask), REST APIs, Microservices, Trame, System Design
- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Tailwind CSS
- **Enterprise Integrations:** SAP S/4HANA (BTP, OData), SAP Business One, QuickBooks
- **Cloud & Infrastructure:** AWS (S3, EMR, EC2, Athena), Docker, Linux
- **Data & Analytics:** SQL (MySQL, Oracle), MongoDB, Pandas, NumPy, Scikit-learn, Tableau, Power BI
- **Engineering & DevOps:** Git, JWT, OAuth2, Unit Testing, Data Structures & Algorithms

## EXPERIENCE

**Oxmaint Inc. | Lead Forward Deployed Engineer | Sunnyvale, CA - Remote** Aug 2025 – Present

- Delivered enterprise AI deployments across multiple clients, integrating intelligent workflows and real-time operational insights into maintenance and asset management systems.
- Built and deployed RAG-based predictive analytics pipelines using historical asset and maintenance data, processing 100K+ records to improve downtime prediction and proactive maintenance planning.
- Engineered enterprise integrations across SAP S/4HANA (BTP, OData), SAP Business One, and QuickBooks, streamlining financial and operational workflows.
- Designed AI-driven automation workflows using n8n, GPT, and Claude, reducing onboarding time by 40% and improving operational efficiency through workflow automation.
- Developed scalable full-stack enterprise applications using React.js, Next.js, TypeScript, Golang, and REST APIs tailored to client-specific business requirements.
- Collaborated with stakeholders during pre-sales and solution engineering phases, conducting demos, gathering requirements, defining implementation scope, and delivering end-to-end enterprise solutions from architecture to client onboarding.

**DePaul University | Research Assistant | Chicago, IL** Aug 2024 – June 2025

- Contributed to two research-driven software engineering projects focused on scalable data platforms and AI visualization systems for medical imaging workflows.
- Developed ByteBridge, a modular microservice-based data management platform using Django and REST APIs, improving research data accessibility and visualization efficiency by 70%.
- Built the OoD Visualizer, an interactive medical imaging dashboard using Python, Trame, and Vuetify (Vue.js) to support anomaly detection and model interpretability workflows.
- Implemented threshold-based filtering and scoring mechanisms for Out-of-Distribution (OoD) sample classification, improving debugging efficiency and visualization interpretability.
- Improved deployment reliability and maintainability through version control, testing, code reviews, and structured development practices.

**DePaul University | Graduate Assistant-Tutoring Mentor | Chicago, IL** Sept 2023 – June 2025

- Mentored 200+ students across Python, Java, SQL, distributed systems, and full-stack development, improving academic performance by 95%.
- Guided students in debugging, optimizing, and designing scalable applications, strengthening practical understanding of system design and algorithms.

## EDUCATION

**DePaul University | Chicago, IL, USA** Jan 2023 – June 2025

Master of Science (M.S.) in Computer Science with Data Science | GPA: 3.96/4.0 | UPE Academic Excellence Honor (2024)

**Muffakham Jah College of Engineering and Technology | Hyderabad, India** Aug 2016 – Sept 2020

Bachelor of Engineering (B.E.) in Information Technology | GPA: 3.75/4.0
